

# Acorn Happenings

October 2024

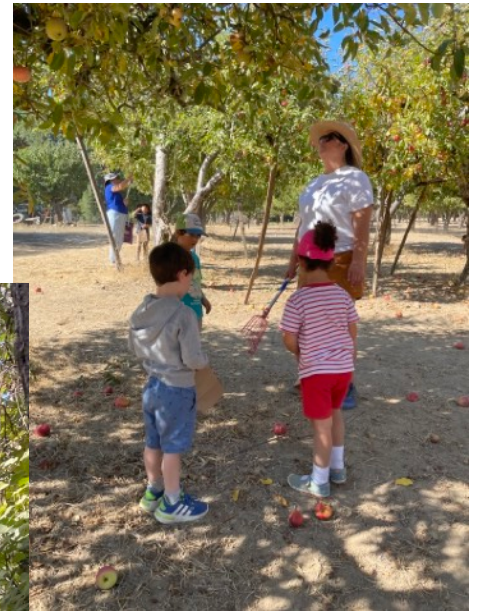

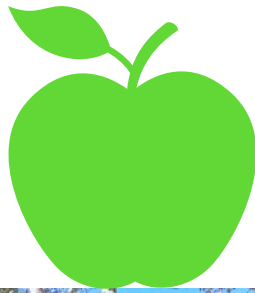

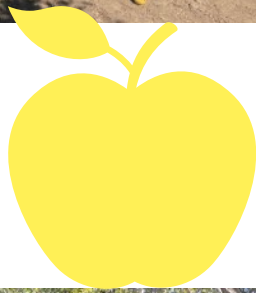

**Our First Field Trip  
Apple-a-Day Ranch**

Along with Ms. Anna's class we spent the morning exploring the process of making apple cider and picking delicious apples at Apple-a-Day Ranch in Sebastopol. We stopped to have a little picnic and climb the hay bales along side a very friendly kitty. It was a great first field trip!

# Engineering

Children have been building ramps, stacking and climbing tires, working with others to create something big and cooperating to use the space and materials as they learn how things fit and move.

# STEAM and Process Art

Using a variety of loose parts as collage materials and art instruments, the children have been creating impressive art pieces. Some pieces are worked on with others, some are created alone, and all are unique and full of learning!

## Fine Motor

At finger gym we strengthen our fingers to ready them for writing

## Our Regular Visit to Mother Oak

## Gardening

## Our Families

Each child got a turn to share their family photos and pages with the class. Then they added their family to the chart. It became a challenge to try and come up with the most family members as we compared the numbers after counting.

## Big Bubble Wrap

It's all about the imaginations!

## Miss Jess' Birthday Pumpkin Carving Tradition

In groups of 4, the children designed, gutted, and carved a pumpkin. Each group chose to make a pumpkin that resembled a "cat" complete with ears.
